

Bayer Postdoc Workshop

May 12th – 15th, 2012

I N V I T A T I O N

The Bayer AG, Germany, kindly invites postdoctoral scientists researching in the fields of synthetic organic chemistry, chemical biology and catalysis to participate in the 2012 Bayer Postdoc Workshop.

This workshop will be an excellent occasion to discuss highlights from Bayer's recent research in the Life and Material Sciences, to present one's individual scientific results and to explore specific job opportunities within the Bayer organization.

Over the next few years, Bayer AG expects to have several openings in its various Research Departments. It is Bayer's intention to attract highly motivated scientists with excellent experience in synthetic organic chemistry and catalysis to fill these challenging positions.

The workshop will take place at the "[Glen Cove Mansion Hotel & Conference Center](#)" close to New York, NY. This location provides a stimulating environment for scientific exchange and discussion. Ample time will be available to make personal contacts with representatives from Bayer HealthCare Pharmaceuticals, Bayer CropScience and Bayer MaterialScience while enjoying the New York countryside in the Long Island area and experiencing its unique cuisine.

Interested scientists with an outstanding background in the above mentioned disciplines are kindly asked to submit their resumes (CV, certificates and abstracts of scientific research) by March 09th, 2012 to:
